</table>

1. To activate the media, place the indicator in an upright position in a plastic crusher. Gently squeeze the crusher to break the glass ampoule. Place the activated indicator in the incubator rack and incubate immediately.

2. Examine the indicator for any colour change at 24h. Record the examining time and results in the table.

## Acceptance Criteria - *Geobacillus stearothermophilus*

- Yellow colour indicates bacterial growth.
- No colour change indicates adequate sterilisation.
